Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

1. Claims 1-19, 21 and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method and system for image compression which includes coefficient significance switching whose the philosophy is that the overheads introduced will be compensated for by the savings in not transmitting bits for small coefficients until they are switched on; good performance might naturally be expected at high compression ratios, but what is surprising is the excellent performance both for lossless compression and for compression at low ratios (specification, page 4, lines 10-15).

Particularly, the new method and system do not teach the following features which the prior art, taken either singly or in combination, does not teach:

- transmitting information representative of the positions of said flagged coefficients and transmitting the bits within the group of said coefficients; repeating steps (d) to (f) one or more times with each new group starting with the most significant bit plane not previously dealt with, and at each repeated pass, also transmitting the bits within the current group of those coefficients which were previously flagged on an earlier pass (see independent claims 1, 17, and 22).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
